Education

Diploma of Software Development

Jan 2025 - Aug 2026

Southern Alberta Institute of Technology, Calgary, AB

- GPA: 3.94

Technical Skills

- **Languages:** Python, Java, JavaScript, Typescript, SQL
- **Frameworks:** React, React Native, Next.js, Electron
- **Tools:** Docker, Git, GitHub, VSCode, PostgreSQL, Bash/ZSH, Microsoft Azure, AWS.

Experience

Software Developer (Contract)

Jun 2026 - Aug 2026

GBTAC, Southern Alberta Institute of Technology, Calgary, AB

- Built an interactive 3D building visualization using Three.js and React Three Fiber, rendering floor plans and recorded thermal data from over 100 building sensors.
- Contributed to a sensor-data processing pipeline that identified data-quality issues and patterns for analysis and reporting.
- Transformed raw, technical sensor data into intuitive graphs and dashboards for non-technical stakeholders
- Supported the development and deployment of three microservices on Microsoft Azure.
- Refined features based on client feedback to ensure alignment with project requirements.
- Collaborated with a team of 5 and a SAIT stakeholder to deliver a cloud-deployed capstone solution.

Projects

Employee Management System | Full Stack Project - In Progress

Sept 2026 - Now

Java, Spring Boot, PostgreSQL, React, TypeScript, Spring Security, REST APIs, Docker Compose

- Designed 6 microservices for authentication, employees, organizations, attendance, leave, and scheduling.
- Secured account APIs with JWT, refresh tokens, password hashing, and role-based access for 4 user roles.
- Designed PostgreSQL models for clock-in/out, shift assignments, scheduling conflicts, PTO, and payroll records.
- Verified authentication and account workflows through unit and API controller tests.

Integrity Registry — Blockchain Software Verification Platform

August 2026

Solidity, React, TypeScript, Hardhat, wagmi, viem, GitHub Actions

- Developed a blockchain-based software integrity platform that records SHA-256 release hashes on-chain and verifies downloaded artifacts through privacy-preserving, browser-side hashing.
- Engineered Solidity smart contracts with role-based publisher authorization, release registration, revocation, audit events, and multi-state verification.

Certificates

AWS Certified Cloud Practitioner (CLF-C02)

AWS Certified Solutions Architect - Associate (SAA-C03)

September 2026

Upcoming
